Want a trampoline that will last the distance ?

When you invest in a Gymleader *Euro Family* or *Competitor* trampoline, you can rest assured that you're buying quality. We have over 35 years of Trampoline manufacturing experience.

Unlike many of the cut price bulk-retail products, Gymleaders are made to perform, and to **last the distance**.

The Frame:

Made from fully hot dip galvanised steel for the ultimate in weather protection and durability. 3mm box section steel provides high strength for rigorous use. Gymleader trampolines are used extensively in schools and gymnasiums where durability is vital.

Tested and proven V shaped legs for increased stability.

The Springs:

Heavy duty 10" galvanised springs, engineered specifically for trampoline use. Spring spacing is tested and designed for optimum performance, and extra corner springs are fitted.

Safety Pads:

High frequency welded for strength and 100% weather proofing, with 25mm bonded foam and covered in UV resistant PVC fabric in a variety of colour options. Laced to the frame with heavy duty UV resistant braided chord. **Full pad coverage for safety.**

The Mat:

Heavy duty Polypropylene mesh fabric. UV resistant. Heavy duty stitching.

Warranty:

A comprehensive warranty against defects in materials and manufacture is provided. In addition, the frame carries a full warranty from CSP Galvanisers. Gymleader trampolines are also exported, and all are built to meet stringent European safety standards.

Weight Limits:

There are none! So long as you use your trampoline for the purpose for which it was designed and manufactured, there are no restrictions on weight loadings.

Picture: Euro Competitor

Sizes / Prices:

Euro Family: 3810mm x 2550mm frame. 3030mm x 1770 mat size. 94 springs. Full safety pad set.

\$1,250.00

Euro Competitor: 4560mm x 2560mm frame. 3780mm x 1780 mat size. 108 springs. Full safety pad set.

\$1,575.00

Assembly / Delivery:

Gymleader trampolines are supplied in kitset form with easy to follow assembly instructions. Alternatively we can deliver and assemble for you. To have your trampoline delivered within the local Tauranga area will cost \$45.00. Should you require us to assemble your trampoline that cost will be \$100.00

After Sales Service:

Your Gymleader trampoline will provide many years of reliable service. A full range of spare parts and pad / mat repair services are available.

All prices are inclusive of GST.

Heavy duty galvanised springs with additional corner springs mounted securely to the welded frame lugs and mat using a proven design that minimises wear.

When you buy a Gymleader, you're buying performance, quality, and long lasting durability.

With a Gymleader, you wont experience this sort of damage, caused by an inferior spring mounting system and light weight frame.

Weather proof UV resistant safety pads are laced to the frame with heavy duty UV resistant braided chord, for greater strength and durability.
